LOCKERBY ALUMNI REFLECTIONS

Even though I graduated from Lockerby nearly a decade ago, I credit it for putting me on a path for success. The skills I learned in the STEP/French Immersion programs helped me immensely in my undergraduate studies and throughout medical school, and my love for the health sciences was fostered by the many incredible teachers. Lockerby really provides a sense of community where the teachers, coaches, and administration are approachable, caring, and focused on seeing every student succeed. I had the opportunity to participate in tons of extracurricular activities, including a variety of sports, bands, and volunteerism, and these programs are second to none. The basketball program in particular provided me with the chance to play at the post-secondary level, and the athletics department is nothing short of amazing. I cannot say enough about the quality of education provided by Lockerby Composite School, and I am proud to call myself a Viking!
