

The most important people in our Coop/OYAP program are the employers. These generous and community minded citizens provide our students with the opportunity to experience the workplace and potential careers while providing guidance to young people as they refine their employability skills.

We are very thankful to all of the employers over the years who have donated their time to our students and program. As well, we are always looking for new opportunities for our students and to that end, encourage any employer who might be interested in having a coop student to contact our Coop/OYAP teacher John Walton. (waltonj@rainbowschools.ca – 522-1750 ext. 6517)

Over the last three years alone, over 130 employers have provided placements for our students in the Greater Sudbury area. We are grateful for their participation and acknowledge their contribution below:
